PdfHelperReader — User Guide & Tutorial

Version 3.0 • Synchronized Dual Reading, LLM Vocabulary Generator & Research Engine

---

Welcome to **PdfHelperReader**, designed for deep reading, language learning, and research. This guide summarizes key features and gestures to get you started.

1. Synchronized Dual-Pane Reading

• **Split View**: Read two PDF documents simultaneously side-by-side or top-and-bottom. Adjust split ratios dynamically using the center divider.

• **Sync Mode**: Synchronize page jumps between your primary book and vocabulary/reference document for seamless cross-referencing.

• **Zen Mode**: Hide secondary panes with a single tap for distraction-free single-page reading.

2. LLM-Refined Vocabulary Document Generator

• **Automatic Vocab Creation**: Generate a companion vocabulary PDF for any book. The generator scans page text for uncommon words and looks them up in our fine-tuned 800,000+ word database.

• **Rich Structural Entries**: Each word entry includes parts of speech (noun, verb, adj), definitions, example sentences, synonyms, antonyms, and difficulty scores.

• **Instant Sync Map**: The generated vocabulary PDF maps directly to your book pages, keeping definitions aligned as you read.

3. In-App Google Search & Research Popup

• **Instant Search Banner**: Whenever you copy text, a popup banner appears allowing you to search Google immediately.

• **Integrated Web View**: Search results load directly inside the secondary pane without leaving the application or switching apps.

4. Optical Character Recognition (OCR) & Project Gutenberg

• **ML Kit OCR**: Extract text on-the-fly from scanned books or image-based PDF pages using Google Play Services ML Kit.

• **Gutenberg Library**: Search and download thousands of free public domain classics directly within the app.

Quick Shortcuts & Tips

Action	How to Use
Generate Vocabulary	Tap **VOCAB** → Select Page Range → Tap **Generate PDF**
Google Web Search	Copy text or tap **Google Mode** in the second pane header
Toggle Zen Mode	Tap the full-screen icon in top toolbar to hide split panes
OCR Text Scan	Tap **OCR** in toolbar to recognize selectable text on scanned pages
