PdfHelperReader – Comprehensive User Manual (v2.1.0)

High-Performance Dual-Pane Reading, Synced Auto-Scroll & Online Library Streaming

1. Welcome & Introduction

PdfHelperReader is a specialized Android reading environment designed for language learning, academic research, and deep study. It pairs your main book document with a companion vocabulary sidecar PDF or an embedded Google Web Search browser in real-time.

2. Upper Main Ribbon Controls (Top Action Bar)

Button	Function & Detailed How-To-Use Guide
B	**Add Bookmark**: Tap to bookmark your current reading position. Captures creation timestamp and extracts the first 25 words from the book page.
BL	**Bookmark List**: Opens saved bookmarks dialog. Shows creation date/time and 25-word book page snippet previews. Tap any item to jump directly to both book and vocab pages.
Both/Book/Vocab	**Split Mode Toggle**: Cycles screen layout between *Both* (dual-pane split view), *Book* (full-screen main document), or *Vocab* (full-screen vocabulary pane).
Z	**Zen Mode**: Hides all toolbars for distraction-free reading, replacing them with a docked vertical right-edge control strip.
SR	**Synced Reading**: Toggles 1:1 real-time bidirectional scroll synchronization. When scrolling either the Book or Vocab pane, the other pane scrolls automatically in lockstep.
AS	**Auto Scroll**: Gentle continuous frame-by-frame auto-scroll calibrated at 1 viewport height / 5 minutes. Touch dragging is supported without stopping auto-scroll.
Sync	**Page Sync**: Instantly jumps the Vocabulary pane to match your current Book page using the exact *vocab_map* array.
G:Vocab / G:Google	**Vocab Mode**: Toggles lower pane between the companion Vocabulary PDF sidecar and the embedded Google Web Search browser.
T	**Theme Toggle**: Switches Dark/Light mode with high-contrast ColorMatrix PDF page color inversion for comfortable night reading.
R:C / R:P	**Reading Mode**: Toggles Continuous vertical scrolling (*R:C*) or fit-to-width Page-by-Page mode (*R:P*).
V:PDF / V:TXT	**View Mode**: Toggles vector PDF page rendering with transparent OCR text selection overlay (*V:PDF*) or plain text extraction (*V:TXT*).
H	**History**: Opens reading history showing First Opened & Last Closed timestamps, with a *Del vocab* button to delete associated vocabulary files.
O	**OCR Generator**: Applies Google ML Kit OCR to image-based or scanned PDFs, adding a searchable text layer saved to *Downloads/PdfHelperReader_files/*.
LOB	**Load Online Book**: Opens online library containing 35 classic books by Dostoevsky, Nietzsche, Wordsworth, and Byron, streamed directly on-demand from GitHub CDN.
OB / OV / LV	**Open Book / Open Vocab / Load Vocab**: Open book/vocab files via system file picker, or generate vocabulary PDF automatically.

3. Online Book Library (LOB Button)

Tapping **LOB** opens the built-in Online Library populated from *online_books.json*:

• **35 Unabridged Classic Books**: Organized by author (Fyodor Dostoevsky [22], Friedrich Nietzsche [10], William Wordsworth [1], Lord Byron [2]).

• **On-Demand GitHub Raw CDN Streaming**: Books are streamed on-demand directly from GitHub CDN into *Downloads/PdfHelperReader_files/*, keeping APK size lightweight (~28MB) while guaranteeing 100% uptime.

• **Disk Caching**: Once downloaded, tapping the book in LOB opens it instantly without re-downloading.

4. Per-Pane Navigation & Header Controls (PaneBar)

• **Continuous Mode Clean PaneBar**: In *R:C* mode, redundant zoom and page flip buttons are hidden, displaying only the Page Jump Counter (e.g. *18 / 512*) and the horizontally scrollable Document Title.

• **Go to Page Dialog**: Tapping the page counter opens the page jump dialog directly.

5. Zen Mode Controls (Right-Edge Strip)

When Zen Mode (**Z**) is active, all toolbars are hidden. A sleek vertical control strip docks against the right screen edge containing Page Badge (tap to jump), Bookmark (**B**), Google Toggle (**G**), Split Mode (**Both/Book/Vocab**), and Exit (**X**).

6. Instant 2-Page Temporary Vocabulary Generation

Generating a vocabulary PDF creates an instant 2-page preview (*[current_page .. current_page + 1]*) in **~0.1s** so you can read definitions immediately while the full document builds in the background.

7. Text Selection & Google Web Search Integration

Highlighting text in **V:PDF** mode shows a floating search banner. Tapping **Google** launches the lower-pane Google Web Search browser featuring **‹ Back**, **Forward ›**, **■ Reload**, and system back gesture protection (**BackHandler**).
